

SAVE/LOAD and EXPORT Skin Presets

SAVE/LOAD

-set the Skin to your favourite Settings

-go to the Skin Presets Window ("SKIN Button" / Save & Load Presets)

-right click on Save to save your Skin Settings

-you have 3 Slots for different Presets

-after save give a name

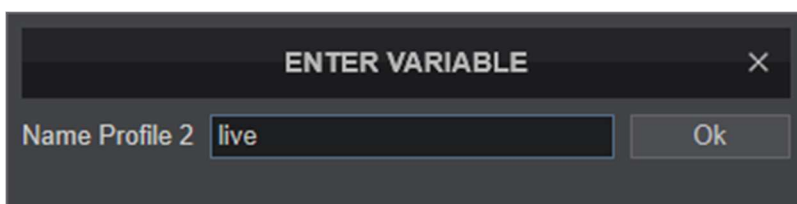

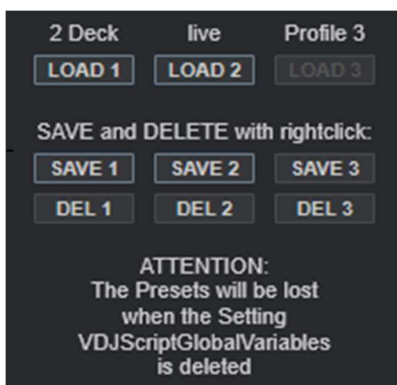

-now you can load your settings

-there are 3 ways to load

→ on the Presets Window

→ on the "Skin Button" Menu

→ with a Custom Button or Mapping
Multibutton 'load1'
Multibutton 'load2'
Multibutton 'load3'

Attention: When you reset the Virtual DJ Settings, the presets are lost. When the Virtual DJ Setting VDJScriptGlobalVariables delete, you lost also your presets.

RESET only Skin, not the Presets

The RESET Button set the Skin to default. Your presets will not be deleted.

Preset Export

EXPORT CUSTOM

Export your Settings

-set the Skin to your favourite Settings

-click EXPORT

-now there opens a Window

-select all and copy

-paste the script to a text file and save it for later use

-for load your exported script, paste the script to a Custom Button

ENTER VARIABLE

select all and copy to save or use on a custom button

ngs & load_skin

Ok
